Dear Mr. Hobbs:

Re: West Kootenay Power Ltd.
Application - Approval in Principle
Issuance of Series H Debentures

This will acknowledge receipt of your letter dated January 5, 1996 applying to the Commission for approval in principle to issue a new series of debentures identified as Series H. It is proposed that the debenture issue will be in the amount of \$25 million at an expected interest rate of 8.77 percent with a term of 20 years. We also note that the debentures will be conditional upon WKP providing to the purchaser, at the time of closing, an undertaking not to issue any additional debentures without first providing the holders of the Series H Debentures a guarantee from UtiliCorp United Inc., parent company of West Kootenay Power Ltd.

The Commission has reviewed your application and gives its approval in principle to this proposed financing transaction pursuant to Section 57 of the Utilities Commission Act.

Following final approval, and upon application, the Commission will issue an Order based on the terms outlined in the application.

Yours truly,

Robert J. Pellatt
